Skills

Basics

- HTML
- CSS
- Javascript
- Typescript

Frontend

- Next.js
- React
- Redux
- Zustand
- Tailwind
- Sass

Backend

- Node.js
- Express.js
- Prisma
- Next.auth
- API REST
- MongoDB
- PostgreSQL

Other

- Jest
- Zod

Professional Experience

07/2024 to Now - CTO Consultant, DevOps, Full Stack

Freelance - Hybrid

- **App Transformation** → Converted a Swift application into a PWA using Next.js/React to expand market reach and improve growth.
- **Strategic Collaboration** → Worked closely with the client to change tech strategies, increasing user interaction and market presence.
- **Backend and DevOps** → Built backend features with Express and MongoDB. Set up AWS services and Vercel for better performance and handled continuous integration for smoother operations.
- **Managed full lifecycle development** → From initial GitHub issue creation and project setup with ESLint, TypeScript, and Prettier for code consistency, to developing new features and a RESTful API, ensuring a streamlined development process.

2023 to Now - Full Stack (React.js / Next.js)

Freelance - Hybrid

- **E-commerce platform** → Built a marketplace for showcasing products, detailing their specs, and getting quotes. Set up automated emails and customized mailboxes. Added translation features using i18n.
- **Geographical Information System (GIS) platform** → Made a platform for advanced mapping and location tasks.

2020 - FRONT-END DEVELOPER (React.js)

Freelance - Remote

- **Publish npm Package** → Modernized the HRnet application from jQuery to React to enhance performance.
- **API REST** → Developed a React web application for Argent Bank focused on user authentication and transaction functionality.
- **Dashboard interactif** → Designed a new user profile page for tracking sports sessions and calories burned using Recharts.

Training

As a developer I'm always learning!

Bachelor's Degree in Application Development - Javascript & React
OpenClassrooms, Level 6 Diploma RNCP

- **1600 hours of training combining theory and practical projects** in HTML, CSS, JavaScript, React, Redux, and Jest.
- **Front-end skills development:** interface optimization, API communication, and authentication.
- **Agile project management** experience, using GitHub and npm.
